Departure of Steamers.

FOR COLLINGWOOD AND THE EAST.

The Collingwood Line of screw steamers leave—one every day, from Dousman's dock, foot of East Water st., connecting at Collingwood with cars from the East.

FOR BUFFALO.

Screw steamers, with good accommodations for passengers, leave the different transportation docks every day for Buffalo.

FOR PORT WASHINGTON, &C.

The Steamer Gazelle leaves Johnson & Olmsted's Dock at 8 o'clock in the morning, for Port Washington, Sheboygan, Manitowoc and Two Rivers.

FOR CHICAGO, &C.

The steamer Traveller leaves Johnson & Olmsted's Dock every evening, at 9 o'clock, for Chicago and intermediate ports.

The Fall Trade in Breadstuffs.

The New York *Herald* confidently looks forward to a very active business in breadstuffs this fall and is also of the opinion that the export of wheat and wheat flour will be larger than was ever known before. The *Herald* considers the subject carefully, and thus states the grounds upon which it arrives at this conclusion:

An impression prevails in certain quarters that the low price of wheat is an injury to this country and that it will prevent shipments to Europe. Two more palpable fallacies it were hard to imagine. There can be no greater boon to this country than cheap flour; and it is, in reality, only when flour is cheap that the foreign trade in it is active and remunerative to all parties concerned. A few figures will make these propositions plain and obvious.

It is supposed that the total wheat crop of the United States this year will be 200,000,000 bushels, or at least 25,000,000 bushels larger than the greatest crop ever known before. Of this crop it is safe to estimate that the people of this country will consume rather more than four bushels per head each; thus assuming, according to the usual estimate, that the aggregate population of the country is now 30,000,000 we must set down 125,000,000 of the 200,000,000 bushels for home consumption. It is only after these 125,000,000 bushels have been grown, harvested, and ground into sweet, wholesome flour, that the country can begin to think of exporting wheat. This simple statement shows how great a boon cheap grain is to this country.—When wheat is $1 a bushel every human being in the country procures the usual supply of this necessary food for $4 a year; when wheat is $2 a bushel, the same necessary of life costs each person $8. The prospect is, at present, that food will be twice as cheap this winter as it was in 1856 and 1857; which is merely another form of stating that the aggregate general prosperity will be twice as great now as then. Cheap and abundant food is the first essential requisite to successful industry, prosperous enterprise and increasing population. Instead of complaining of the low price of grain, as people are heard to do in Wall and South streets, it is really a matter of hearty and profound congratulation and thankfulness to Providence.

On the other hand, the cheapness of grain is no bar to its export. If after the people of this country are supplied, there remain 75,000,000 bushels of surplus wheat, it is very evident that it must go abroad to countries where they have no surplus. It will not, under any circumstances, be kept here to rot in our warehouses. If there are good harvests in foreign countries, the price will not be as high as it would be if the foreign harvests were bad; but whether the foreign farmers have been fortunate or unfortunate, sound American wheat will always command some price in foreign markets, and to get that price instead of rotting, it will be sent abroad. At the present time wheat is held here too high to be shipped to Liverpool at a profit.—But this arises simply from the fact that our home supply of sound wheat has fallen very low; as soon as the new grain begins to come freely to market, the price will fall, and the decline will not be checked until a point is reached which leaves a profit on shipments to Europe. The natural course of prices may be disturbed for a time by speculative movements, but in the long run, the law of supply and demand must operate. As soon as the price falls to a point which permits shipments to Europe, they will begin, and will go on until the whole of our surplus—say 75,000,000 bushels—is exhausted.

An examination of the trade circulars does not confirm the gloomy apprehensions of those who go about complaining that we are going to get nothing for our grain. At the present market price of new American wheat in Liverpool, it would pay a handsome profit if it could be bought here at $1 a bushel.—And every grain merchant will certify that the average cost of wheat shipped at this port to Europe for the past ten years has been under, and not over, $1 a bushel.

In a word, we have a surplus of wheat this year of 75,000,000 bushels—about twice our average surplus, and, at present rates in foreign market, this wheat will command more than the average price obtained for American wheat shipped to Europe during the past ten years.

It remains to be seen how the foreign grain market will fluctuate during the autumn.—There are those who look for a further fall in grain in Europe. But there are many reasons for anticipating the very reverse. The product of the grain bearing countries of Europe must be affected by the enormous diversion of labor from agriculture which has been caused by the war. Neither the English nor the French harvests are yet out of danger.—The Russian crop, we know, has suffered from drought. And even supposing that the European crops prove everywhere as bountiful as they were last year, the price of wheat in England is very low at present; very considerably below the average for the past ten years. On the whole, the weight of probability is rather in favor of prices in Europe than against them; and the prospect is fair for a grain export from hence this fall greater than the largest heretofore known.

We are aware that some plausible arguments may be advanced here in the West, against the *Herald's* low-price theory, but still if we look at the subject from a disinterested stand point, the correctness of its position can not be questioned. Farmers may be disappointed at not getting the prices for their wheat, that the condition of affairs in the old world, a few weeks ago, led them to anticipate, but they should remember that they have been blessed with a most bountiful yield, and that good crops and moderate prices must prove a greater benefit to all classes, than poor crops and high prices.—*All* branches of industry will profit by the former state of things; the latter would be beneficial only to *a few* while injurious to the masses. They should also bear in mind that unusually high prices for breadstuffs can only be the result of an unusual derangement of commerce and agriculture, the evil influences of which are *always*, sooner or later, felt.

But we hardly think that such very low prices will prevail this fall as one might suppose, from the present condition of the markets. Just now the wheat market is suffering from the effects a terrible re-action, the result of the wild speculation that was rife, at the opening of the war. As soon as the effects of this re-actionary movement pass away, prices must seek their true level. Another consideration that should be taken into account is the fact that the new crop is at the least calculation 25 per cent better in *quality* than that now on the market, and will therefore be so much more valuable.

In regard to the reasons the *Herald* gives for expecting a lively trade this fall, we may add that there are no promises of high prices in the future sufficiently encouraging to induce farmers to take the risks of hoarding their produce, while many of them are in such circumstances that it becomes a necessity to dispose of their surplus grain as soon as it is ready for market. We agree therefore with the *Herald* that there is every prospect of an active business in breadstuffs the coming fall.

The Chiriqui Gold Discoveries.

The arrival of the *Moses Taylor* at New York, brings the announcement of discoveries of $100,000 worth of gold images in a turracca, or Indian tomb, at Chiriqui, on the Isthmus. BALL and BLACK, the silversmiths on Broadway, have on exhibition several of the images, they are pronounced to be rude imitations of animals and birds, and probably were originally made for idols.

One is a human figure about three inches high, with the head of a monster. Another a spread eagle. Another a frog, and there are a variety of nondescripts that will make an highly interesting study for the lovers of Indian antiquities. Some of the images are of gold mixed with copper alloy; but the greater part are of 20 carat gold. There was considerable excitement on the subject of Panama, and on the 15th of July, three clipper schooners were advertised to sail for the "diggins" with passengers and freight.

Chiriqui is the name common to a river, lagoon and archipelago in New Grenada, in the department of the Isthmus. The river after a northward course, enters the lagoon, which is separated from the Carribean Sea by the Chiriqui Archipelago. The Chiriqui Lagoon is a spacious bay with three entrances, and capable of containing ships of the largest class. It extends along the coast about 90 miles, and 40 to 50 miles inland.—David is one of the small towns on the Archipelago. The Panama *Star* and *Herald* has some interesting facts in regard to the images.

A PARDONABLE MISTAKE.—Speaking of the comments of the Republican Press upon the CASS-LE CLERC letter, the *Jeffersonian* gravely says:

> The Republicans may be compared to the renowned Knight, Don Quixote de La Mancha. They have mistaken wind-mills for giants.

GEN. CASS, who has heretofore passed for a "giant" in the Democratic Party, will hardly thank the *Jeffersonian* for setting him down as a "wind mill." Still, there is more truth, than poetry, in the description; and the Republican Papers may thank the Sancho Panza of the *Jeffersonian* for setting the matter right.

> NEW DEMOCRATIC PAPER IN MILWAUKEE.—A new Democratic paper is soon to appear at Milwaukee. M. A. Calkins editor. It will be a good one.—*Appleton Crescent.*
>
> We take pleasure in copying the above fact. There is now *no* Democratic paper in Milwaukee, and Mr. Calkins is eminently qualified to publish a good one.—Success to him.—*Chicago Herald.*

We *did* suppose that the *News*, *Seebote*, *Banner* and *Volksblatt* were all "democratic papers"; but as the Chicago *Herald*, the organ of the Buchanan Administration and the National Democratic Party, declares that there is no such thing in Milwaukee, it is clear that we must have been mistaken. Pray where are the *News*, *Seebote*, &c. to "go to," if turned out of the Democratic Party?

THE CHOICE OF MICHIGAN.—The Detroit Daily *Herald*, referring to the next Presidential election, speaks of WILLIAM H. SEWARD, of New York, as "the first choice of the people of Michigan in the last two Presidential contests and *now!*" The State of Wisconsin shares in this sentiment and will gladly give her electoral vote in 1860 to Senator SEWARD, as the ablest Statesman of the day.

A HUSBAND SHOOTS HIS WIFE.—From the New Orleans *Picayune* we learn that on the 10th inst., a melancholy accident happened near Brandon, Miss. A Mrs. JACKSON had occasion to go during the night to the window of the room in which, with her husband, she had been sleeping. While engaged in arranging the blind or shutter, the husband awoke and seized his gun, supposing that some felonious intruder was in the room. Mrs. JACKSON advanced towards the bed, although her husband called out to her to stop, or he should fire, and he actually discharged his musket at her, and she at once fell dead. He then turned to the place where he supposed his wife was lying beside him, to tell her that he had killed some one, when, not finding her, the truth flashed upon him that he had shot his own wife. This is the story; it is almost incredible.

RELIGIOUS FREEDOM IN LOMBARDY.—The old Austrian laws are abolished, and the following decree issued:

> "That in the Lombard provinces all the citizens, whatever the religion they profess, are equal before the law and shall equally enjoy all civil and political rights as in the elder provinces of the monarchy. All orders and regulations of contrary effect are abrogated."

It is to be seen whether this right will be abrogated by the new Italian Confederation.

RETIREMENT OF BISHOP KEMPER.—We see it stated that Bishop KEMPER is about to resign the commission he has so long held as Bishop of the Northwest, and to officiate only as Bishop of Wisconsin. The Church *Record* in announcing his determination to retire from the field of Missionary labor, speaks of his service in this wise:

For a quarter of a century he has traveled over these great prairies, and up and down these magnificent rivers, planting everywhere the Church of God, till his name is a household word from the Wabash to the St. Peters. Indiana, Missouri, Iowa, Wisconsin, and Minnesota, have all marched into the line of our great army of Dioceses under his leadership, and Kansas and Nebraska will soon follow. When he took the charge of these imperial regions, scarcely half a dozen clergy ministered in all the territory now occupied by these States. There are over one hundred and fifty here now. The work that has been accomplished here by his indefatigable energy, and self-denying devotion, no arithmetic can compute. Ever ready, never tiring, unselfish to a fault, disdaining ease, he has given himself up to his Master's work, in a measure and degree unsurpassed since apostolic days. No Bishop of the Church of Christ in America, ever traveled more thousands of miles in the discharge of his holy duties, or planted the banner of the Cross in more unoccupied territory, or conquered for the Redeemer's church, finer empires than Bishop Kemper has done.

THE CROPS.—From all parts of this county, and the adjacent territory, we have the unanimous report that the crops on the whole never looked better. There is only one seriously anticipated danger to wheat, and that is the chintz bug, which has appeared in some places. Whether it will prove widespread is yet uncertain. The average yield of wheat per acre in this county, if not seriously affected by the bug nor wasted in harvesting, will not fall short of 25 bushels, which must be three times that of last year. Besides a much larger area was sown. Rye, oats and corn are all much above the average. Grass is rather lighter than usual, while potatoes on dry land will be nearly a failure unless we have rain soon.

We warn the warehouse-men of Green Bay and Milwaukee to "spread out," to accommodate a few millions bushels wheat from up this way.—*Berlin Courant, July 28th.*

FIRST LOAD OF NEW WHEAT.—The first load of new wheat was raised by Messrs. Cobb & Campbell, of the town of Clinton, and purchased by the Farmers' Mills at 95 cents a bushel. It is the California wheat, cut the 15th inst., and is a bright, though not very large berry.—*Janesville Gazette of yesterday.*

HARVESTING.—Last Monday morning, many of the farmers in this and other towns in Jefferson County commenced harvesting their wheat crop, which they acknowledge is of a very superior quality, being plump and heavy and far surpassing that of last year.—*Jeffersonian, July 28.*

College Regatta at Worcester—Harvard Victorious.

The first Annual College Union Boat Club Regatta, which came off yesterday on Lake Quinsigamond, near Worcester, Mass., and which was participated in by students from Yale College and Brown and Harvard Universities, the last named proving the victors, was one of the grandest affairs of the kind ever witnessed in the Eastern States, and will no doubt be the initiative for a long series of similarly interesting yearly exhibitions.

The College regatta, it will be remembered, was postponed from last year on account of the death of one of the Yale crew.

Four boats were entered from three Colleges as follows:

Brown University entered the Atlanta, a six-oared, streak boat. This is the only club boat belonging to Brown University—is heavily built and was never designed for racing.

Yale College entered the college boat Yale, a six-oared shell, just finished by Makay, of New York, and manned by a picked crew from the Yale navy. The model is beautiful, and the Yale was far the best boat entered.

Harvard University entered the Avon, a six-oared lapped streak, built by Coyle, of St. Johns. She is owned by four gentlemen of the Senior class, and manned by a crew from the two upper classes.

This college also entered their famous boat, "The Harvard," a six-oared shell boat, built by Makay, in 1857. This is the college race boat, and was manned by the six best oarsmen in the college.

Mr. Makay has lately built a new shell for this crew, to carry a coxswain, but the old boat was pulled on this occasion.

The waters of the lake were perfectly still, and the shores near the judges stand were crowded with people to the number of four or five thousand, many seats being erected for the occasion.

At four and a half P. M., the boats came in line and presented a very neat appearance, the red handkerchiefs and white shirts of the Harvard crew being particularly striking.

At the start the boats kept close together. The Harvard taking the lead, the Avon kept close behind, and the Atlanta slowly dropped astern.

The Harvard then pulled ahead, leaving a close contest between the Avon and Yale, who kept changing places as far as the stake, where the Yale was thirty seconds ahead

As the boats came down from the stake the red caps of the Harvard appeared far in advance. They were followed at a respectable distance by the Yale and Avon. The Atlanta still kept far behind.

The Harvard crew came in pulling seemingly at great ease, with the quick clean stroke for which they are so noted. As the boats neared the judges stand loud cheers were given for them, particularly for the winners. The course was a mile and half and repeat. The time as follows:

Harvard—Nineteen minutes and eighteen seconds

Yale—Twenty minutes and twenty seconds.

Avon—Twenty-one minutes and thirty-one seconds.

Atlanta—Twenty-four minutes and forty seconds.

The names of the Harvard are as follows: C. Crowninghield, stroke; W. H. Forbes, E. G. Abbott, H. S. Russell, J. H. Wales, J. H. Ellison, bow.

In justice to the Atlanta it should be added that their boat was heavy and they had no hopes of competition with the shells.

The Avon, too, is a lap streak boat, and was at a great disadvantage in rowing against the Yale.

The sport ended with a brisk shower, which quickly scattered the spectators, who otherwise greatly enjoyed the afternoon.

The prize consisted of a set of flags, which were given to the Harvard crew amidst great applause.—*N. Y. Herald, July 27.*

SENTINEL READING ROOM.

WE have opened in connection with our new Counting Room, 207 East Water st., a Reading Department, where all the leading Daily Papers in the United States and Canada are regularly placed on file, for the benefit of those who may wish to see them. Strangers visiting the city are invited to avail themselves of our "Free Reading Room" at their pleasure.

POOR DOG TRAY.—The cow question is about to be engulphed,—swallowed up in that more dreadful one—of dogs. To those who are crying out to the Police to kill and spare not, we would reveal the horrible fact that between three and four hundred dogs have been stricken with strychnia since the edict went forth. This enormous number of dead curs does not seem to have diminished the number of living ones, it is true, but our Police are doing their best, and those who are anxious to see the returns may investigate them at the Chief's office.—People having dogs of any worth, may take a hint from this and muzzle them at once.

HEROIC CONDUCT OF A BOY.—Thursday afternoon the wife of one of our most respectable citizens was out "boat riding" in company with a mere lad; when passing through the straight cut, by some unaccountable means the lady was precipitated into the water. Without a moment's hesitation, the lad, P. F. SMITH, plunged in to her rescue, and, we are told, succeeded without any other assistance, in extricating her, and with the exception of a little fright neither of them was "the worse" for the unexpected plunge.

OUR REPORT OF THE TRIAL.—Our readers will find reported below a portion of the evidence in the case of the State *vs.* S. M. BOOTH. We have inserted stars in those places where the nature of the testimony was such as to be unfit for publication.

— * * they —— * * he * * * for * —— * to * at * the * * * * * * * evidence * * * * * witness retired. * *

OFF FOR IRELAND.—Our old friend and fellow-citizen PATRICK MALLON, who has resided in Milwaukee these ten, or twelve years past, and has always followed an honest calling, leaves to-day on a brief visit to Ireland, the country of his birth. We cordially wish him a prosperous journey, a pleasant visit, and a safe return.

HARVEST WEATHER.—Nothing could be finer for the harvest than our weather for the last ten days. We have have had an uninterrupted succession of bright, cool sunshiny days, with a fresh breeze, all the while, from the North and East.

THAT BOOK.—Certain of our exchanges are in the habit of penning ironical puffs of our cotemporary, the *News*, for humorous reasons of their own, and no matter how monstrous, our jolly compiler, the poet, transfers them *in toto*, to his columns. Within the past six months (we believe) a great addition seems to have been made to the corps of that paper, in the shape of an "unparalleled Commercial man." A prodigy of mercantile sagacity. A walking, indicting synopsis of cent per cent wisdom, and a genius to boot, who not only grasped everything transpiring in the commercial world, with one effort of his gigantic mind, but had that higher qualification, the power of communicating his greatness by eloquent commercial leaders, burning statistics, to the enraptured dealers throughout the West. At least, all this was told of him by the jolly locale, and duly echoed by the jolly friends of said locale, throughout the State. *And it is all true.* We cannot for a moment doubt the superiority, the enterprise, or the genius of the acquisition.—Nor can any one, who has ever encountered him while in the pursuit of his arduous duty. Imagine a man of splendid parts, rather loose clothing, and eyes that dwell in futurity altogether, coming down Water street. The man is accompanied by a book. None of your pocket memorandas—none of your note-paper affairs—but a book of the *genus* ledger and family *octavo*. A book that presently becomes the only point of sight upon which your vision can rest. The man sinks away to invisibility; you see only a vast book and a monstrous pencil; you watch it going round corners, and working itself through crowds; view it with admiration, astonishment, consternation. You follow it to the Chamber of Commerce, and breathlessly watch its sharp edge running between private groups of merchants, like a cutwater of Enterprise as it is; see it march up to a hob-nobing couple of wheat men, and open itself under their noses; see it chase a lumber dealer, two squares,—throughout the day the unwearied book glides through the high and by-ways, of the city, gleaning. Such a thorough commercial book was never known, and the only question that remains unsettled, in connection with the genius and octavo, is, *what* becomes of the *gleanings?* Has anybody ever discovered any of the mercantile treasures, picked up by this book! Verily, we believe that instead of publishing them, our book stores them up somewhere, after the manner of a miserly book, and is content in the mere glory of his exertions, and the appreciation of the jolly poet.

ORGAN.—The fine instrument recently constructed under the supervision of Mr. LE DROIT, is remaining at the work-room of Mr. O'BRIEN, on Michigan street, where it may be visited at any hour of the day. It is in many respects, a superior piece of workmanship, and one of which Milwaukee may justly be proud. It stands eleven feet high, and is eight feet wide by six feet deep.

It has 13 stops, *viz:* Pedal check; Principal, 8 feet; Viola d'Gamba, 8 feet; Hold Flote, 8 feet; Bourdon Bass, 8 feet; Octave, 4 feet; Bellows Signal; Pedal and great; Pedal Bass; Flageolette 2 feet; Flute a Cheminee, 4 feet; Flute Angelique, 8 feet; and Tremulant. The most of our resident musicians have already examined this organ, and speak highly of its tone and capacity.

A CLIPPER YACHT.—Sorensen, at his yard over the river, is completing a handsome little sail craft designed for yachting on the Bay. She is 31 feet long, 12 feet beam, and 4 1-2 feet deep, with cabin capable of accommodating six or eight persons. She is to be called the "*Fayaway*" after Melville's Indian girl in "Typee."—*Green Bay Advocate.*

The said "clipper yacht" is said to belong to Colonel CHARLES D. ROBINSON, of the Green Bay *Advocate*, who is as much at home on the water, as in his editorial *sanctum*. We promise ourselves the pleasure of making the acquaintance of the "*Fayaway*" ere another moon has waxed and waned.

THE "PICAYUNE" of this week is decidedly rich. Those in want of funny papers should subscribe for this weekly. One of the best things in the last number, is a picture of LOUIS NAPOLEON in Austrian dress, with the following: "*The last Telegraphic despatch from the Emperor of the French.*—The war is ended, peace proclaimed between the Emperor of Austria and myself; we have embraced and exchanged meerschaums. Italy may go to the devil. I have been wearing all day the Emperor of Austria's cocked hat."

PEOPLE'S COFFEE POT.—Our friend N. W. Dean, presented us with a coffee pot. We took it home, put in the coffee with our own hands and personally superintended the making. The result was all that we could hope, and enables us to pronounce, of our own knowledge, the "People's Coffee Pot" as the achievement of the age, in that line. It is manufactured by Goodrich & Johnson, hardware manufacturers, Milwaukee. This firm are also engaged in putting up house furnaces and kitchen ranges which we have heard very highly spoken of by those who have tried them. They have just placed a range in the kitchen of the Capitol House, which has excited unbounded admiration in that tip-top establishment.—*Madison Patriot.*

PRIZES.—The Executive Committee of the ninth annual fair to be held in Milwaukee in September, have offered three prizes of $25 each for the Essays. The first for an essay of not less than 25 or more than 50 pages of foolscap manuscript, on the best system of general form arrangement; the second for the best plans, constructions and arrangements of farm buildings, &c., and the best essay on Horticulture.

FOR THE EAST VIA COLLINGWOOD.—The splendid fast sailing steamer *Fountain City*, Capt. PECK, leaves DOUSMAN & Co's dock to-morrow (Sunday) morning, at 9 o'clock, touching at Mackinaw and all intermediate ports. For passage apply at the Company's office, No. 70, East Water street, J. MCCARTY agent.

LATE NEW YORK PAPERS.—We are indebted to BAMFORD & BALDWIN, News Agents at the Milwaukee & Mississippi R. R. Depot, for New York papers in advance of the mail. Messrs. BAMFORD & BALDWIN have always on hand the latest New York dailies, weeklies and periodicals.

FOR THE EAST.—The upper cabin steam packet *Iowa*, Capt. JONES, leaves G. D. DOUSMAN's dock to-day at 3 P. M. for Buffalo and intermediate ports. For passage apply at the Company's office foot of East Water street, JOHN A. GRIFFIN, agent.

PARTIAL ECLIPSE OF THE SUN.—A partial eclipse of the Sun was observable in this city, yesterday afternoon, about 5 o'clock P. M. The obscuration was so slight, and the sunlight so brilliant in the cloudless sky, that smoked glass had to be brought into requisition to see the sight.

SACRIFICE OF PROPERTY.—It is too bad that those 26 splendid building lots situated in ROBERT DAVIES' Subdivision on Spring St. Avenue, are to be sold by the Sheriff to-day, at 2 o'clock, but it will be a good chance for mechanics and others, to buy a good lot at their own price. It being a foreclosure sale they must be sold to the highest bidder. It

ELDER WARREN will lecture at Good Templar's Hall, near the Custom House, on Sunday, at 3 and 7 1-2 o'clock, P. M. The public are respectfully invited to attend.

The Courts.

In the Circuit Court the case of the State vs. S. M. BOOTH is still progressing slowly.

MUNICIPAL COURT—HIS HONOR, JUDGE FOOTE, PRESIDING.—THURSDAY, July 29.—N. Murphy, drunk; penalty $1,00 or five days imprisonment. Execution issued.

J. Flaherty, drunk and disorderly; penalty $3,00 and costs.

A. S. Seybaum and John Byres, drunk and disorderly. The former fined $1,00 or five days, the latter $3,00 or ten days imprisonment. Committed.

H. Zekind, disorderly; penalty and costs $6,08. Paid.

A BLOODLESS VICTORY!!!

1,000,000 BOXES SOLD OF

MOREHEAD'S

MAGNETIC PLASTER

THIS ENORMOUS QUANTITY OF this Invaluable Remedy has been purchased by citizens of the United States during the short time it has been before the public. The reason for this extraordinary success is simply in the actual truth and value of the article. No one buys the MAGNETIC PLASTER without becoming its friend. It performs all that is promised, and carries with it its own recommendation. Truly this is a Victory—peaceful and bloodless—but we believe not less glorious than the triumphs of war, with its train of carnage and desolation.

The MAGNETIC PLASTER is undoubtedly the Greatest Strengthener and Pain Destroyer that Science has yet discovered. If you put this Plaster anywhere, if Pain is there, the Plaster will stick there until the Pain has vanished. The Plaster magnetises the Pain away, and

PAIN CANNOT EXIST WHERE THIS PLASTER IS APPLIED.

Rheumatism, Lameness, Stiffness, Weakness, Debility, Nervousness, Neuralgia, Dyspepsia, Coughs and Colds, Pains and Aches of every kind, are IMMEDIATELY RELIEVED, and, with a little patience, PERMANENTLY CURED, by the magical influence of the MAGNETIC PLASTER. It is the simplest, surest, safest, pleasantest and cheapest remedy in existence. Its application is universal—equally to the strong man, the delicate woman, and the feeble infant. Its use is agreeable, and without annoyance or trouble. Its price is within reach of all—rich or poor; all may have it, and all should have it who are sick, and suffering in any way.

FARMERS and PLANTERS should always be supplied with the MAGNETIC PLASTER. It will be the Good Physician in any household, ready at all times and at instant notice.

Put up in air-tight tin boxes. Each box will make six to eight plasters, and any child can spread them. Price, twenty-five cents per box, with full and plain directions. D. C. MOREHEAD, M. D.,

Inventor and Proprietor, 19 Walker St., N. Y.

MOREHEAD'S MAGNETIC PLASTER IS SOLD BY ALL DRUGGISTS AND DEALERS IN GENUINE MEDICINES EVERYWHERE. dec12h525d3awawly

TELEGRAPH!

REPORTED BY THE N. Y. ASSOCIATED PRESS FOR THE DAILY SENTINEL.

Kansas Constitutional Convention.

LEAVENWORTH, July 29—3 P. M.

The convention has nearly completed its labors, and will probably adjourn to-morrow. The Constitution will be radically anti-slavery, but differs from the Leavenworth instrument, inasmuch as it does not extend the right of suffrage to negroes. The State Legislature will consist of 72 Representatives, and 21 Senators. The business of the Convention has been disposed of with tolerable expedition; the questions of appointment and a temporary capital being the only measures which offered serious obstacles.

Topeka has been elected as the temporary capital; Lawrence being a competitor. The efforts of the partizans of both places revealed considerable corruption, both inside and outside of the convention. One or more members were implicated in bribery.

The indications are that the ratification of the constitution will be vigorously opposed by democracy, as its strong measures, the annexation of the —— District, the exclusion of free negroes, the prohibition of a bank of issue, and the preservation of the present Western Boundary, which includes the gold regions, have all been defeated.

The *Times* has interesting private advices by the arrival of the Express last night from Denver City on the 20th inst.

The mines continued to yield well, and the new lodes were constantly developing richness. A great many miners had been compelled to quit work on account of a scarcity of water.

A Company had commenced the construction of a flume, eleven miles long, to convey water from the neighborhood of Mountain City. Tunnelling had also been commenced.

A Swindle Exploded

NEW YORK, July 29—3 P. M.

An immense swindle has just exploded. It is called the Grand Duchy of Baden or fourteen million loan, connected with a lottery of which the Messrs Rothschilds were represented as the European agents. Constantine, Fellner & Co., were the agents in this city. This firm has been operating extensively in the South and West, but are now missing.

Bank Bills Thrown Out.

PHILADELPHIA, July 29—3 P. M.

Brokers throw out the notes of the Monongahela Valley Bank of the Western part of Pennsylvania.

LATEST NEWS!

BY LAST NIGHT'S REPORT

Later From Europe!

ARRIVAL OF THE OCEAN QUEEN!

ST. JOHN'S, July 29—9 P. M.

The steamship Ocean Queen, from Southampton 20th, and the Needles on the 21st, was intercepted off Cape Race at half-past 8 this morning.

The steamer Nova Scotian arrived out on the 18th inst. No general news has been received.

The following summary of news is furnished:

The Emperor Napoleon had arrived at Paris from his Italian campaign.

Austrian funds were buoyant, and subscribers to the new Austrian loan had been released from their obligation.

A new ministry had been formed at Turin, Manora being constituted Minister of War and President of the Council.

The Bank of Berlin had lowered the rate of discount to 4 per cent.

Arrival of the Anglo Saxon.

FARTHER POINT, July 29—9 P. M.

The steamer Anglo Saxon from Liverpool on the 20th, passed this point to-day, bound for Quebec. The papers contain nothing additional in regard to the basis of peace.—The discontent resulting from Napoleon's hasty course, was apparently on the increase, particularly in Italy. Napoleon had arrived at St. Cloud. The Queen of Portugal is dead.

The budget of the Chancellor of the Exchequer, Mr. Gladstone, had been presented to Parliament. Its figures show a deficiency of 5,000,000 sterling. Mr. G. prefers taxation to any other means to meet the deficit. He proposes to add four per cent. to the income tax duties on malt spirits; tea and sugar is exempt.

Prince Napoleon was at Genoa on the 17th.

The Vienna correspondent of the London *Times* says the representatives of Austria, France and Sardinia will soon meet at Zurich to conclude the treaty of peace. There will be no meeting of the congress which was called to ratify the treaty. The Emperors of France and of Austria having agreed to settle the difficulties without the intervention of neutral powers.

The Paris correspondent of the London Post says, that both of the Emperors are convinced that the basis of peace agreed upon, is in many respects impracticable.

The English journals continue to ridicule the terms of the peace. The Post, Lord Palmerston's organ, attacks the proceedings at Villa Franca with some severity.

The Paris correspondent of the News says there is a feeling of disappointment and even of indignation among all who took a sincere interest in the object of the war. The Emperor has seriously lowered himself in the opinion of all classes.

GREAT BRITAIN—In the House of Lords on the 18th the debate was confined to the despatches between England and Prussia in regard to the war.

Washington Matters.

WASHINGTON, July 29—9 P. M.

Advices received here from Nicaragua, give assurance of a fair prospect of a satisfactory settlement of the transit difficulties, and speak in confident terms of the ability of Gen. Juarez to restore the rejection by Congress of the article in that *Lamas Zelada*, which is objected to by our Government.

There seems to be no doubt but the mission to Central America will be tendered to Judge Bowlin, whose visit to Bedford was on that business, by invitation.

The Treasury balance on the 25th was nearly $5,000,000; the receipts for the week ending on that day, $2,252,000; the amount of drafts paid, $1,616,000; of drafts issued, $2,114,000; amount of increase over the former week, $138,000.

A letter from Superintendent Johnson has been received at the Indian Bureau, in which, speaking of the difficulty between the Pawnee Indians and the citizens of Nebraska, he says no white persons have been killed but the whites have killed two Indians and wounded one. The Indians making no resistance when they were approached by the citizens, who were more culpable in producing the difficulty than the Indians.

From Havana.

NEW ORLEANS, July 29—9 P. M.

The steamship *Granada*, from Havana, on the 25th, via Key West, has arrived here.

Sugars, dull but unchanged. Sterling Exchange, 1,12 1-2a1,13. Exchange on New York, 2 per cent.

A postal treaty, between Capt. Gen. Concha and U. S. Consul General Helm, has been consummated. The mails are to be made up by the General-Consul of the United States.

Excursion—Accident.

FOND DU LAC, July 29—9 P. M.

Nine hundred men, women and children left this place for a sabbath school celebration at Menasha.

Just as the steamer Wolf was leaving her dock to return home, a son of Mr. Ackerman, eight years old, fell overboard and was drowned. No other accident occurred.

Later from Pike's Peak.

ST. LOUIS, July 29—8 P. M.

A special despatch to the *Democrat* says that three men arrived at St. Joseph to-day, bringing with them $12,500 in gold dust.—These parties disposed of $8,000 at Omaha; making a total of $20,500 from the Kansas mines.

The Kansas Constitutional Convention adjourned *sine die* to-night. The Constitution was adopted by a vote of 34 to 13. All the democrats voting against, and refusing to sign it.

CHARLESTON, S. C., July 29—9 P. M.

The steamer Huntsville bound for New York, was discovered to be on fire this morning and immediately put in for shore. Twenty-five of her passengers reached this city this P. M., in a pilot boat. The steamer has also reached this city and run along side of the southern wharf. The cotton in her hold is on fire, and the firemen are pouring in streams of water. It is impossible to learn the extent of damage done.

LOUISVILLE, Ky., July 29—9 P. M.

President Fowlkes, with $50,000 to pay the first instalment of the Southern Pacific road, left here to-day for Marshall, Texas.

Steamer Sunk.

MEMPHIS, July 29—9 P. M.

The steamer Return, a White River packet, sunk at Du Hall's Bluff, on Tuesday. Loss $10,000; not insured. No lives lost.

As for good living, gentlemanly servants, and a house for the traveller, it is not surpassed, even by the showy Newhall House. Republican State Convention.

A Republican State Convention will be held at the City of Madison, in the Assembly Hall of the Capitol on Wednesday, the 31st day of August next, at 12 o'clock M., for the purpose of nominating candidates for State officers to be supported by the party at the ensuing general election; and to transact any other business that may properly come before it.

As the subject of selecting delegates to the next National Convention may be entertained and acted on by the Convention, it is suggested that the people in their primary caucuses, and the district conventions make such expression as will intimate to their delegates and the State Convention, the general sentiment of the State on that subject.

Each Assembly District will be entitled to two delegates in the Convention.

It is recommended that District Conventions for the selection of delegates be held throughout the State, on or before the 25th day of August, and that committees make early calls for that purpose; and it is especially urged that every district be duly represented in the Convention.

The State Teachers' Association---Matters at Madison.

MADISON, Thursday, July 28, 1859.

The State Teachers' Association met promptly at 8 o'clock this morning, in the Assembly Chamber, and resumed the business which was interrupted by the exercises and festivities yesterday. Upwards of *two hundred and fifty* Teachers were in attendance, full one-half of them ladies, and the Assembly Chamber, spacious as it is, hardly sufficed to accommodate them. The general appearance of the Teachers, thus collected in a body, was very striking and augured well for the interests of our Public Schools. The first business in order was the report of the Committee on the subject of the revision of the School Laws. This was discussed at some length, by different members of the Convention, and ultimately adopted; a Committee, consisting of Mr. PICKETT, of Horicon, Mr. PRATT, of Sheboygan, and Mr. McMYNN, of Racine, being appointed to co-operate with the Committee selected by the last Assembly, to draft a new School Law. After some routine business, Professor BUTLER, who fills the chair of Ancient Languages in the University, was introduced to the Convention, and read an admirable essay upon the importance of classical studies. The argument was exceedingly well put and very happily illustrated, and was addressed, moreover, to a very intelligent and appreciative audience.—The essay was warmly applauded and the thanks of the Association voted to the accomplished author. A brief recess followed, and then Miss BISSELL, of Prairie du Chien, read a clever paper upon actual and ideal women. Some of the hits were palpable and called forth both laughter and applause. An invitation to attend the Horticultural Society's Floral Exhibition this evening was stoutly resisted by the Utilitarians, but being earnestly advocated by Mr. KILGORE, the Superintendent of the Madison Schools, and finding favor in the eyes of the ladies, was finally accepted by the Convention. Shortly before 1 o'clock, the Convention adjourned for dinner until 2 P. M.

Re-assembling at that hour, the Association had the pleasure of listening to an address from Mr. E. P. LARKIN, Principal of our Second Ward High School, upon the subject of "Moral Instruction in Schools." It was listened to with marked attention, and presented some views on this topic which may well claim the consideration of School Teachers. Quite an interesting discussion followed the reading of this Essay, in which the Chairman, Mr. PICKET, President CHAPIN, of Beloit College, and other gentlemen, took part. Mr. JOHNSON, of Fond du Lac, next delivered an address on "Mental Culture," discussing his subject at some length and with much ability. Other exercises followed, but an engagement elsewhere prevented my hearing them. The afternoon, like the morning Session, was a pleasant and profitable one for the members of the Association.

The Convention will probably conclude its labors and close its session to-morrow. The occasion has been a very interesting and I doubt not a useful one. It has attracted a larger number of Teachers to the Annual Gathering than has attended any previous one; and the remark was made by many "outsiders," who visited the Assemby Chamber this morning, that it was the best looking body of School Teachers they had ever seen. The citizens of Madison not only kindly provided all of them with comfortable quarters, but have spared no pains to make their sojourn in our beautiful State Capital as agreeable as possible. The Teachers, as they separate and return to their different homes, will carry back with them none but pleasant reminiscences of Madison and its abundant hospitalities.

Among other objects of attraction about the Capital, at present, is the Supreme Court, now composed of Chief-Justice DIXON, and Judges COLE and PAINE. The Bar, both here and at Milwaukee, are quite unanimous in their praise of this Court. The Judges hear arguments from 8 A. M., to 1 P. M., Daily, and spend the remainder of the day in their consulting room, digesting the arguments and disposing of the cases, which they have heard during the morning. This new practice, which enables the Judges to decide many causes without a day's delay, is highly approved by both lawyers and clients.

The State Lunatic Asylum, beautifully located upon a bold promontory on Fourth Lake, about five miles' drive from Madison, is rapidly approaching completion. The edifice is a handsome and substantial one, and will accommodate about a hundred patients. The Trustees hope to have it ready for use by the first of December next.

The politicians at Madison, of both parties, are beginning to discuss the probable doings of the two Nominating Conventions which meet here on the 24th and 31st of next month. The prominent candidates for Governor, on the Democratic side, seem to be ex-Gov. DEWEY, Col. FAIRCHILD, and CHAS. D. ROBINSON. There are so many elements entering into the canvass, however, that no one can very well predict the result. A pretty sharp struggle is anticipated in the selection of Delegates to the Charleston Convention. The Douglas men are confident of having things their own way, but are by no means decided what that way should be. The prevailing opinion among the Republicans is, that our present faithful and capable State Officers, Governor RANDALL, Treasurer HASTINGS and State Prison Commissioner McGRAW, will be re-nominated and, with those who may be associated with them on the Republican Ticket, will be re-elected by decisive majorities. As to the selection of Delegates to the National Republican Convention for 1860, no objection is perceived to deferring that matter till next year. R. K.

ANOTHER CONTESTED WILL CASE.—Some excitement and feeling has grown out of the discovery of the fact that Mrs. BLANDINA DUDLEY, widow of the late Hon. CHARLES E. DUDLEY, of Albany, has signed a trust deed by which nearly all her property is made over to RUTGER B. MILLER, Jr., of Utica. It is asserted that Mrs. DUDLEY'S signature was obtained by unfair or false representations—she being made to believe that she was signing some paper relative to the Dudley Observatory, of which she has been a liberal patron. She is an old lady, and in such a state, physically and mentally, as to unfit her for the transaction of business.—Law suits are in prospect over the matter.

Southern Contempt for Northern White Laborers.

Senator IVISON, of Georgia, has been making one of his pleasant disunion speeches at Griffin, Ga. The following passages from a synopsis of the Hon. Senator's speech, which we find in the Columbus (Ga.) Sun, gives a sufficiently clear and comprehensive idea of the production:

> "The proud and enviable condition of the poor white man in the South, compared to the degraded White Slave of the North, is owing to the existence of African Slavery in the South. If the question of emancipating the negroes was to-day submitted to the people of Georgia, nine of ten who own no slaves would vote in the negative. *Slavery must be maintained—in the Union if possible—out of it if necessary—peaceably if we may—forcibly if we must.* He was once the advocate of Squatter Sovereignty, but had repented of and recanted the error. Subsequent investigation had convinced him that the true theory in relation to the Territorial Governments of the Union is, that it is both the power and the duty of Congress to pass laws for the protection of Slavery, wherever it exists, or may exist, upon the common soil."

Senator IVERSON, like his Democratic yoke fellow, Senator HAMMOND, of North Carolina, entertains the most profound contempt for the mechanics and working-men of the Free North. In the estimation of these aristocratic Slave-holders, the white laborers of the North are "*the mud-sills of Society.*" And yet Sham Democracy expects to make these "mud-sills" the stepping stones to political power and office.

The Patriot and Treasurer Hastings.

The *Patriot* of Wednesday devotes another column and a half to a defence of its proposed *eighteen thousand dollar* foray upon the State Treasury, and to further maledictions against Mr. HASTINGS for quietly locking the door and keeping the parties out. These vindictive and persistent assaults of the *Patriot* upon the State Treasurer, for simply *doing his duty*, "without fear, favor or affection," have had precisely the effect we anticipated. From all parts of the State comes up the response of the People, "HASTINGS is a faithful sentinel at the door of the Treasury. We must keep him at his post." And so, beyond all doubt, they will, in spite of the lamentations of the marauding *Patriot*.

The Janesville *Gazette*, referring to the diatribes of the *Patriot*, well says:

> Such assaults as these will do Mr. Hastings no harm; his reputation as a man and public officer, honest, faithful and capable, is too firmly established to need any defence, and the only motive for noticing the *Patriot's* vituperation is to show the cause of it.

The Oshkosh Incendiaries Detected.

Correspondence of the Sentinel.

MENASHA, July 27, 1859.

MESSRS. EDITORS:—Several of the Chicago "detectives," under the charge of WHITNEY FRANK, Esq., have been at work for the last two months ferreting out the incendiaries who burnt the city of Oshkosh. After having ascertained the guilt of CASS, of Horicon, and one man at Oshkosh, the police moved their quarters to Menasha, where they have been dilligently at work for the last three weeks. Facts enough were elicited, last week, to convict JOSEPH LACY and GEORGE LONGSTAFF, but arrests were delayed for further developments. So LACY proposed to one of the "detectives," who had been stopping with him in disguise, that if he would join him he would "try his hand again" at Oshkosh. The proposition was accepted, and Tuesday night last appointed for the "job." Mr. FRANK having been informed at what point the fire would be set, was promptly on hand with assistants, and "nabbed" Mr. LACY in his second murderous attempt to burn Oshkosh. The next morning, early, LONGSTAFF was arrested, and has divulged the whole transaction, and all the plans and parties connected with the great fire. Mr. FRANK, for his efficiency, competency and success in this affair, merits the warmest thanks of the whole community, for having detected and brought to justice the most dangerous gang of villains that ever infested a community.

About two hours previous to the fire attempted to be set by LACY, the jail at Oshkosh was burnt. There were seven inmates—two prisoners escaped and one was burned Whether the jail was set on fire by some of his gang for the purpose of rescuing their leader, JERRY ATWOOD, who was confined there, or by some other parties for other purposes, it is not yet known. There is much excitement in the city; large numbers congregated together, and it is not impossible but Judge Lynch may dispose of the prisoners in a summary manner before this reaches you.

Respectfully, H.

The Ordinance of Freedom.

> "Sec. 6. There shall be no Slavery in this State, and no involuntary servitude, unless for the punishment of crime whereof the parties shall have been duly convicted."—*Kansas Constitution.*

"You may slay the Wilmot Proviso in the Senate Chamber and bury it beneath the Capitol to-day, but the corse, in complete steel, will haunt your Legislative halls tomorrow" So Gov. Seward told the Compromisers in the U. S. Senate in 1850. They did not believe him. They slayed the Proviso and buried it. And here it comes back to them again, in complete steel, from Kansas!

In "Section 6," given above, are reiterated the brief but efficient words by which the Jeffersonian Ordinance of 1787, secured the Freedom of Ohio, Indiana, Illinois, Michigan and Wisconsin. These words, adopted ten years ago, in regard to our Western Territory would have saved the Union from prolonged and bitter sectional strife. The citizens of Kansas have now decided to enter them on the pages of their Constitution, and in so doing, not only guarantee the prosperity of the new State, but confer a benefit at large.

Their adoption, last week, at Wyandot, forms the closing event of a five years' struggle, such as the United States have never witnessed before, and such as we trust may never be necessary again. For the first time, a contest between the Slave Power and Freedom has been fairly and determinedly fought out to the end, and for the first time, therefore, in such a contest, victory deserts the former and rewards the latter.

The incorporation of the "Ordinance of Freedom" in the Constitution has been won in spite of the persistent hostility of the dominant party in the Union, backed by the whole power of the Federal Government. It is a significant warning to future unscrupulous Presidents, that even if backed by venal Congressmen and subservient Judges, they cannot force upon a free people, institutions repugnant to their will.

But the Democrats, like the Bourbons, learn nothing from experience. Should they be replaced in power at Washington next year, they would re-enact the same senseless crusade against popular rights, and bring upon themselves again the same retribution. Even now we shall not be surprised to see them employing the brief space of power that remains to them, in striving to thwart the admission of Kansas with the Constitution of her choice. The official organs already mutter maledictions, and intimations are given that without absolutely refusing its sanction, Congress may yet be induced to indefinitely delay it. But it will be in vain. Every hour of delay which the Democratic party creates will be only another weight added to the millstone already about its neck.—*Albany Evening Journal.*

The Crops in Iowa.

From the Davenport Gazette, 26th.

We have closely observed our Iowa exchanges during the last week, and they comprise newspapers from every quarter of the State. In looking them over, we find not a single indication of a failure in the leading cereal crops of Iowa. Last week we were told by a gentleman who had traversed the State, that the wheat crop in this county showed more signs of injury by blight, &c., than the crop of any other locality of Iowa—yet the result of the present harvest is proving that the wheat crop of Scott county was never better than this year. Indeed, wherever in this or other counties there is a partial failure, it is almost invariably the fault of the *farmer*, not of the season. Many wheat fields are thinner than usual, yet so much heavier is the grain as to make up even in these fields an average good crop.

We feel well assured in presuming the wheat crop of this, the greatest wheat-growing county in the State, as above the average of good seasons, and that the wheat crop of Iowa will be greater this year than ever before. More than this, not only will the quantity of wheat harvested be much greater than ever before, but the quality will be far better. The barley crop will excel in quantity and quality any of our former crops, and it is now becoming one of our most valuable productions. Timothy was never better. Corn looks admirable in some quarters, and in others badly needs rain. It is much behind last year, but promises to turn out a fuller crop. Iowa is this season *flush*. Our farmers will generally be enabled to pay their debts and start out anew. Every interest in the State will be advanced and confidence in us abroad fully restored. We see a bright future in these rich returns of the harvest time. Indeed, as a State and a community, we are literally *saved.*

ELEVENTH WEEK OF THE WAR—THE ARMISTICE AND THE PEACE.

July 8—Armistice concluded between the two Emperors at Villa Franca—Zara bombarded by the French Frigate *Impetueuse.*

July 11—Interview between Napoleon III. and Francis Joseph—The war terminated by the PEACE OF VILLA FRANCA.

The Highway Men of Trimble County, Kentucky.

Correspondence of the Cincinnati Gazette.

BEDFORD, TRIMBLE CO., KY., July 25.

A paper of Madison, Ind., stated that Judge Nutall had made a requisition upon the Governor of the State for a company of militia to protect the prisoners to be tried this day, which being heard of in this county a great excitement got up, resulting in the organization of a mob. The paper which had made the tale up out of whole cloth—for there is actually no organized militia company in the State, the new law not going into effect for two years, and the old one having been repealed—stated that a regiment would arrive at this place on Sunday morning.

The mob accordingly resolved to hang the prisoners, fearing that they would escape, or at least be taken from the county. About seventy-five armed men met at the blacksmith shop, fully bent upon death. Mr. Nicholson, a son-in-law of Hall's, happened near, and made a speech, imploring the people to allow the due course of justice to be followed. Apparently his words had no effect; the men marched to the jail yard and demanded the custody of the prisoners. A number of speeches were now made; the falsity of the rumor was pointed out, and the anger of the people was turned upon the editor of the sheet, who probably saved his bones by being absent.

This morning the town is animated with men, women and horses. Persons are here from all the adjoining counties. The Judge is anxiously looked for every minute.—The array of counsel will be some. Tom Marshall is to be here, but whether for the prosecution or the defence, he did not himself know, when I heard from him at the Henry Circuit Court. Will Pryor and Mr. Pat. Majors (the Prosecuting Attorney) are in for the prosecution, certain. Crittenden, of Madison, a nephew of the Senator, S. J. Guthrie, of this town, and De Haven, of La-Grange, defend Hall. Roberts and Morris will plead guilty. I have not heard who has been retained by Toddhunter.

HORRIBLE CONDITION OF AFFAIRS IN VENEZUELA.—The New York *Herald* contains full details of the late news from Venezuela, from which we select the following statement of the condition of affairs in that country:

"The aspect of the country is at present very gloomy, for the revolution appears to be one of color or of race. The tendency is, however, marked by the different factions that rise in the republic under the victors of Zamora and Falcon; and under these names they have committed, and are committing, all sorts of crimes, robberies, incendiarism, murders, rapes, &c., so that the government is already so powerless against them that it temporizes with them, and leaves itself open to the charge of being more a partizan of theirs than the protector of the people who placed it in power.

Puerto Cabello has suffered from one of these factions headed by the negro General Guebara; and sustained by the brothers Juan Lermet, and Cadet Laroche and Colonel Domingo Diaz. It has for the propogators of its infernal doctrines one Robert Syers, one Cornell, and others—men who, without any merit of their own, have succeeded in elevating themselves by inculcating to the negroes communism and its kindred theories.

The faction of the negro Guebara on the 5th of June, murdered and robbed with impunity several honored citizens in their own houses, in the suburbs of Puerto Cabello, and on the night of the 17th they had so alarmed the citizens that the youth and all the police force remained under arms all night and repelled the rioters, driving them into the mountains of Moron, in the neighborhood of Puerto Cabello. Up to the 2nd of July the rioters were there entrenched, and in a condition to defend themselves; but the government, instead of sending a force to exterminate them, sent a commission to the assassins, composed of the brothers Laroche, Colonel Diaz and others; but this commission the negro Guebara, in the hope of carrying out his villianous ideas, did not admit. This proves that the government extends its sympathy to these factionists, for it cannot otherwise be comprehended how a government could pardon such wretches.

Poor old general Paez has been publicly exiled, and departed for Philadelphia in the barque Rowena the same day as ourselves — Families are emigrating, and all are filled with consternation and dismay."

The following is an extract from the Farewell Address of Gen. PAEZ, upon his second departure from that country:

"Fellow citizens! Hear once more the voice of my heart. Do not destroy each other; do nor ravage the beautiful country the Almighty has given to you; let those who govern you be observant of the constitution and laws; let the people use with wisdom their invaluable rights; let those bloody revolutions, the stigma of Spanish America, take place no more in our country."

THE FEAST OF THE NINE CARDINALS!—We've been there, and had a glorious time of it.

The steamer Favorite proved itself a *favorite* indeed, and the pleasure party on board have "recorded" that Capt. Davidson and his Clerk Rhodes are genuine Sons of Malta.

The old denizens of Fort Snelling would never have dreamed that the courtyard of the Fort would at this time have resounded with noise of City omnibus wheels; but Burbank, besides being good at everything else, has got it *recorded* that a true Son of Malta can carry the luxuries of the City where any brother of the Order shall desire it.

Some outsiders, in reading our notice yesterday, wondered if the Feast of the Nine Cardinals was to come off twice in two days; not knowing, in their benighted ignorance, that the feast can come off every day in the year, if any single brother so "records" it!

We found the grounds of Minnehaha crowded with thousands of Sons, but they were generally invisible to those who could not see with the eyes of the true faith. It was a little amusing to witness the honest inquiries of a plain country man, who came inquiring for the encampment, Ward Beecher, Senator Douglas, Garibaldi, Jerome Bonaparte, &c., and when we told him they were to have been here, but were unavoidably detained on business of the Order, he went off with a bewildered look of confused obliquity.

But the invisible Grand Wild J. A. has "recorded" that we must stop here!—*St. Paul Minnesotian.*

The New Italian Confederacy.

Even the warmest friends of LOUIS NAPOLEON in this country hesitate to endorse that portion of the Treaty of Peace which places the new Italian Confederacy under the Honorary Presidency of the Pope. The New York *Post* says:

"If the Confederacy is to turn out, under the imperial manipulations, no more than a formal Congress of the existing despotisms of the peninsula, watched over by the despotisms of France and Austria, and guaranteed by their bayonets against popular uprising and progress, then it will prove the most stupendous humbug of the nineteenth century. Louis Napoleon will have forfeited his word in a more signal manner than he did in the overthrow of the French Republic, which he had sworn to support; he will have cast away the finest opportunity for making a name of indelible nobility that ever man had; and he will provoke outbreaks, sooner or later, of the revolutionary forces, which may again deluge Europe in blood. It was for no such paltry end that Europe and America applauded his departure, and the Italians hailed his approach. No such end can justify the sacrifice of fifty thousand lives, the ruin of fertile provinces, and the disastrous disturbance of the peace of the world. If he has only this to proclaim as the result of this campaign, the glory of Montebello, Magenta, and Solferino, will dwindle into the shame of wanton, cruel and useless bloodshed.

"That the Papal Power is greatly enlarged and extended, and that the Emperor of the French, therefore, instead of being an enemy of the Pope, as the Roman Hierarchy have accused him of being, is, as he has been, its greatest Protector, Defender and Propagandist.

"That Italy gains nothing in this settlement, except in the transfer of that small part of it known as Lombardy, from one monarch to another.

"That the oppressions and sufferings of the Liberalists, or Friends of Freedom for Italy, now in Parma, Modena, Tuscany, and the Papal States, will be more severe than ever, and that in exile alone, will be found safety for the greater part of them.

"That the Confederation of Italy—with the despotisms of Venetia, Naples, Tuscany, the Papal States, Parma and Modena—Lombardy under Sardinia, alone liberal—is a mockery, or an impossibility.

"That such a settlement cannot stand five years, unless France and Austria keep 200,000 men in Italy.

"What an assumption of divine authority is this by which two mere men, one an usurping Emperor, the other the Emperor of the accident of birth, thus dispose of millions of other human beings, their lives and their property, and their rights"

"Much and justly," says the Philadelphia *Gazette*, "as the tyranny of Austria has been condemned, the temporal government of the Papal States is infinitely worse."

CHAMPAGNE,

FROM

De Venoge & Co., Epernay, France.

THIS IS A PERFECTLY PURE AND DELICATE WINE, from the vineyard of Messrs. De Venoge & Co., whose estate lies in the *centre of the far-famed Champagne District of France.* It has hitherto been confined to the best tables of England and the Continent, and has only very recently been introduced into this country, where its rare quality, combined with the moderate price at which it is offered, is already achieving a success and popularity unprecedented in the annals of the Wine Trade.

Sold in this city, by............ and at the principal Hotels, and by all the leading dealers throughout the country.

THE PURE WINES OF HUNGARY.

STATE ASSAYER'S OFFICE, 32 Somerset St.,
Boston, July 1st, 1858.

Messrs. FREUND & GROSSINGER,—

Gentlemen:—I received from you eight samples of Red and White Hungarian Wines, which, at your request, I have submitted to chemical analysis. I send you the details with this letter.

From my researches it appears, that these Wines are pure, and they contain nothing but the products of the grape. I can confidently recommend them to the public as good and pure wines, and as not so likely to become sour as the light wines of France.

I exposed my samples forty-eight hours to the air, in a warm room, without any souring having taken place.

The general character of the red Hungarian Wines is that of the Red Burgundy of France, and the White Wines (with the exception of the sweet or dessert wine) are between Hock and Sauterne, but somewhat stronger than either of these.

I am satisfied that, when known to the public, the Hungarian Wines will be greatly in favor, and that they will be much sought for.

Respectfully, your obedient servant,
CHARLES T. JACKSON, M. D.,

A CARD TO THE "LADIES."

Dr. Duponco's Golden Periodical Pills
FOR FEMALES.

THE COMBINATION OF INGREDIENTS in Dr. Duponco's Golden Pills are perfectly harmless. They have been used in the private practice of old Dr. Duponco for over thirty years, and thousands of ladies can testify to their great and never failing success in almost every case, in correcting irregularities, relieving painful and distressing menstruation, particularly at the change of life. From five to ten pills will cure that common yet dreadful complaint, the Whites. Nearly every lady in the land suffers from that complaint. The above pill has permanently cured thousands, and will cure you if you use them. They cannot harm you, on the contrary, they remove all obstructions, restore nature to its proper channel, and invigorate the whole system. Ladies whose health will not permit an increase of family, will find these pills a successful preventative. Pregnant Females, or those supposing themselves so, are cautioned against using these pills while pregnant, as the proprietor assumes no responsibility after the above admonition although their mildness would prevent any mischief to the health—otherwise, these pills are recommended. Full and explicit directions accompany each box. Price $1,00 per box. H. BOSWORTH & SONS,
Wholesale Agents for Milwaukee.

They will supply the trade at Proprietor's prices, and furnish circulars, and show cards. Sold also by H. Fess, jr., 195 East Water st., J. M. Alcott 206, J. H. Tesch, 9 Spring St., and C. H. Gardiner & Co., 19 Spring St. "Ladies" by enclosing $1,00 to H. Bosworth & Sons, or either of the above Agents, can have the above Golden Pills sent to any part of the country (confidentially) by mail.

N. B.— Be particular in asking for Dr. Duponco's Golden Pills, and remember, they are not a secret nostrum, every agent is given the receipt composing the Pills, and they will tell you they are the best and safest Pill for Females, ever introduced since the science of Medicine dawned upon the world.

QUICK CURES OF BILIOUS COLIC.—This distressing complaint demands prompt attention. It will readily yield to the R. R. R. treatment. Whenever you find bile rising from the stomach, or a sour taste after belching, take three or four of R. R. REGULATORS, likewise one-half a teaspoonful of READY RELIEF, every 20 minutes; rub the bowels, back and spine well with the Ready Relief; also lay a flannel wet with Relief across the Bowels. In fifteen minutes you will be free from the distressing pain; the violent spasms will be arrested, and vomiting entirely stopped. In three hours a pleasant operation of the bowels will take place, and your whole system will become regulated and healthy.

Persons who indulge in too much green fruit, or [illegible] or unripe vegetables, and indigestible meats, should take a dose of RADWAY'S REGULATORS after eating, and they will prevent violent attacks of colic. Keep the stomach clean and pure from acid, the Bowels and Liver regular, and no sickness will trouble you—R. R. Relief to neutralize acid; R. R. Regulators to regulate the system. R. R. R. Office, 162 Fulton st.

Comb Making—The Factory of Carr, Brown & Co.

From the Newburyport (Mass.) Daily Herald.

The Comb, for distangling and adjusting the hair, for an ornament to the head, is an emblem of civilization, and marks its progress over the world as clearly and as truly as does the razor and its use by men. Barbarous people do not manufacture combs, nor use them unless introduced by others, as they do not use the razor for shaving in the removal of the useless and unsightly hair upon the face. So our old Saxon ancestors were greatly surprised at the free use of the comb by the more civilized invaders who conquered their island and mingled with them. On the other hand, the civilized and progressive peoples, from the most remote antiquity, have been acquainted with these useful inventions. So we have taken from the monuments of the ancient Egyptians, where they had been concealed for ages and ages, while revolutions and peoples have come and gone and been forgotten, combs made of wood, with fine teeth on one side and course on the other, not much unlike the wooden combs in use hereabouts twenty years ago. Sometimes there would be but one row of teeth, and upon their wooden backs would be the figures of animals; or, where they had two, they were ornamented by carved work between. The Greeks probably borrowed the invention from the Egyptians, and in the manufacture they used boxwood most commonly, though as they ascriben golden combs to the goddesses, it is not unlikely that they wrought them from metals. The Greek women very carefully and gracefully arranged their hair; and so did the matrons and maidens of Rome, who also generally used combs from the boxwood of the Asia Minor Mountains, specimens of which have been taken from the ruins of Pompeii. They also used iron, brass, ivory, silver, and gold. How much they thought of this matter may be inferred from the fact that many of the sepulchral inscriptions were dedicated to their dressing maids. We have representations of ancient Roman combs, which show that in the then state of mechanical knowledge, they must have been made at great labor and expense, and their use was of course confined to the more wealthy class. They sometimes had fine teeth, delicately wrought and well proportioned, and the handles, where the material was of wood, were often overlaid with ivory, and ornamented with gold.

In the middle ages and in modern times, combs have mostly been of wood, horn, ivory and shell, and in some of the warmer countries the ornamental combs have been large and costly. Those manufactured in this town, by C. H. Coffin and others, twenty-five years ago, for the South American markets, were larger than ladies' bonnets are now. They were often from two to three feet wide, encircling two-thirds of the head, and from six inches to a foot high on the back, the top being wrought in open work; and to these the Spanish American ladies attached their veils. One comb consumed three horns, or an equal quantity of shell; and as much of the work was done by hand and with the saw, and the polishing was entirely manual labor, the prices were from twenty to fifty dollars.

The first horn combs manufactured in this country were made in West Newbury, just after the revolutionary war. A Hessian settled there who was accustomed to the working of horns into buttons and combs, and from him the art—if the rude workmanship of that day was worthy to be called an art—was taught to the native population. West Newbury has continued to lead in the business ever since, and to-day it is the largest comb-making town of the Commonwealth, though most of their work is now in Vulcanized India rubber. This is done by S. C. Noyes & Co., who are as well known in comb manufacturing as the Lawrences have been in cotton manufactures, and deserve to be more, for they have not only furnished the capital and labor for extended operations, but the members of this firm and their immediate ancestors have invented more than half the machinery now in use in comb-making on this continent, and their ingenuity is constantly adding to and improving their machines—numerous and wonderful as they are.

There are besides their factory, in that birth-place of the business, their establishments for horn combs—one of Emery and Poor, who manufacture dressing and pocket combs—and another of G. T. O. & T. M. Chase, who furnish a variety of fancy combs; and yet others of less importance in the present depression of the trade. After West Newbury, other towns in this State engaged in this business, and of these we think that Leominster is now most largely interested, though there are factories at Clinton, Northborough and other places, all of them more or less suffering from the competition of the rubber manufactories. How extensively the business is pursued out of this State, we are not informed. There are several factories in Connecticut, and other and larger ones in Philadelphia. The products of their labors are not confined to this country, but are thrown into the markets of other and distant nations.

Newburyport was known as a comb town years ago; but the business was subject to fluctuations—depending much upon the caprice of fashion—and in one of the ebbs of the tide the work was abandoned. The last operations, until the present enterprise of Carr, Brown & Co., was the factory to which we have referred, belonging to Mr. C. H. Coffin, that was located at the head of what is now the Cushing wharf, and to run which he set in motion the first steam engine run for manufacturing purposes in this town. The factory gave employment to a large number of hands, and we well remember how the puffing of its engine under the direction of the little Dutchman, who came near blowing up the whole concern because he did not want "to lose the good steam," was the wonder of our boyish days. When that stopped, comb making ceased till that on Fair street was commenced by Carr, Brown & Co., who employed fifty hands, and require the full force of one of Corles' sixty horse-power improved engines, to run the great variety of machinery that covers every floor of the establishment, and daily turns out six hundred dozen of the best combs that are manufactured in the world.

In going over this comb factory on Wednesday, we thought that but very few of our readers could be acquainted with the variety and amount of labor performed from the time a horn enters one door till it goes out a comb, or several combs, on the other side of the building. They were then at work on what are termed dressing combs, with the exception of one or two men, who were on fine combs; and the combs were piled up in the finishing room, neatly packed in boxes, and labelled for any part of the world; of all sizes—some longer and some shorter, some finer and some coarser; some wider and some narrower; some for hotels and some for dressing rooms; some for ladies who would grace saloons and parlors, and some for the chattels of the plantations, whose hair is notted at both ends and rolled up in the middle; and notwithstanding some of them are sold so low, yet there is not a comb that has not passed through from fifteen to twenty processes, and as many different pairs of hands, before it is ready for the market; and it is only owing to the rapidity with which they are made that a profit is realized for the manufacturer. Let us look at them in the different stages of operation.

Down here in the basement is a huge pile of horns: where did they come from, and what of them? Oh, their history will never be written! Down from the interior of Africa, floated in canoes, and conveyed by slaves, some may have come; on the oases of the deserts; on the upland prairies where are the great cities and the new races, of whom Livingstone, and Anderson, and Barth tell us, they may have been grown, and paid for in rum, and gunpowder and tobacco, the three great civilizers that the Christian merchants send to the coast of Africa to convert the Natives with! More likely, however, they were produced by the immense herds that graze the new land of South America—on the banks of the Amazon, and South of that on grande La Plata, or the Parana, and from the big plains, where Spaniards, and Portuguese, and Indians have intermixed, till the race is half white and half colored, half civilized, half savage, half Christian and half Pagan. But as the American horns are white, and better, and this company use the best of stock, the most of them are from the Brighton market; but even these come from a wide field—from the Rio Grande in Texas, to the pastures of the Aroostook on the east, and from a dozen different States at least. Six hundred oxen must die somewhere every day of the week, or nearly two hundred thousand in a year, to furnish the raw material for this one factory! That is a number of cattle of which few have a just conception, and if they had to march up in single file and shake off their horns at the gateway, they would make a long line of beeves.

Close by the side of a horn pile, we hear the hum of circular saws; buzz, buzz—their teeth not seen, and barely the plates, with such velocity do they move; and there stand the men to saw them into the right length; when the round pieces are split ready for straightening and flattening. We see that those not suited for combs, passing one way, where again they are sawed, if of proper size, to make knife handles and the extreme ends are packed and sent for exportation to Germany, whence they are returned to us as the mouth-pieces for pipes and cigars. We follow the comb pieces to the next floor, and see them softening in boiling water and oil, and when soft, run through knives, by which the rough places are made smooth; then placed between cold irons till they are cool and hard and straight. We look into another room, which is full of saws and belting, where these rough pieces are all cut to dimensions; and by the side of one of the circulars stands a native of the Emerald Isle minus of two or three fingers, indicating that the saws sometimes slip through bones as well as horns. But while we look the piece is passed between other sharp machinery, to be caravaned, as they call it, to be smoothed and reduced to a uniform thickness we should say, and again it passes to hot irons to remain for hours, perhaps days. When it comes thence, for dressing combs, it is quilled, or that part to be cut into teeth made thinner than the rest. Next, the teeth themselves are cut roughly, in a very ingenious manner, which, we believe, they call twinning. Formerly, the interstices of the teeth were cut out by a thin saw, and of course the strip of horn made but one comb, the fragments being lost. Now, the piece makes two combs, the sides of the strip which are left ridged in the quilling process, furnishing two backs, and the teeth being between, which are formed by fastening the strip in a carriage which is moved forward till it comes under a chisel, that with the precision of clockwork, cuts out the two combs, the teeth of one lying between those of the other.

When the teeth have been cut the two combs are pulled apart, and again replaced, and then go into cold irons to press and straighten. That thing done, they go through several other processes. One man shapes the points of the teeth, another the sides of the teeth, and a third smoothes the edges of the backs—all being done by machines; and afterwards they are polished and packed up, and sent to markets, as distant from this and each other, as the points whence the horns are received, though they should be collected from the four quarters of the globe and the islands of the seas.

We do not pretend to have given all the movements of a piece of horn from the time it starts under the saw till it is completed, or to have called things by the names used by the workers, and which would have no more meaning to the general reader than they did to us as we passed rapidly through the building. We stopped in going through the last door, which was in the shop of Mr. D. H. Smith, a very ingenious mechanic and worthy man, who keeps their machines in order, and was making new ones for the combmakers of West Newbury — indeed, who is capable of anything in his line of business—and looked back into the building with wonder at what we had seen. If we had been a spiritualist, we would have held our hands on a table three weeks to have got up the ghost of that old Hessian who commenced the business in West Newbury, with a hand saw, a pot of water over the fire and pieces of horn in splits of logs or between hot rocks, to have heard what he would say to all this improvement. Nor was it improvement alone, but saving; for where much of the stock ran to waste formally, all is saved now: even the shavings are bagged up and sent to Philadelphia to make Prussian Blue, and the refuse matter goes to a New York Glue factory. The whole business is wonderful and interesting.

CASH SYSTEM.

HAVING ADOPTED THE CASH SYSTEM for the past year, seeing its advantages, particularly to our customers, we have concluded to continue selling our goods for Cash the coming year. We will sell in small or large quantities to suit customers, at such prices that we know are better than they can do elsewhere, taking quality into consideration.

We are confident the CASH SYSTEM is the only true one, and shall make increased efforts to do business on that basis, and no house can successfully compete with us.

RETAIL DEPARTMENT.

To this Department, we call the especial attention of all in the city, country, and places tributary to Milwaukee, as possessing advantages to any store in the West. Our stock is larger, the assortment more numerous, and quality of the goods, superior to that which you generally find in Hardware Stores.

Please call upon us, or send your orders, and we will endeavour to please you, both in prices and goods. TERMS CASH.

TINNERS' STOCK.

We keep constantly on hand a fine stock of TIN PLATE, COPPER, ZINC, WIRE, SHEET IRON, and everything used by Tinners. Our prices are low, and we are prepared to compete with any other place, CHICAGO NOT EXCEPTED. Please send in your orders with the cash, and the goods will be shipped without delay. apr18.

1851:—
"Tell LEA & PERRINS that their sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome sauce that is made."

Beware of Counterfeits!
IN SOUP,
In gravy, with Fish, Meats, Game, Salad dressing, &c., LEA & PERRINS' WORCESTERSHIRE SAUCE imparts piquancy, zest and flavor; gives tone to the stomach, assists digestion, and promotes health.

SOYER'S SULTANA SAUCE.
For Hot or Cold Dishes of all Kinds.

THIS MOST DELICIOUS and appetizing Sauce was invented by the renowned "SOYER," on his return from the Crimea, and since his decease is manufactured by CROSSE & BLACKWELL, London, from the original recipe. The manufacturers simply ask for it a trial, convinced that it must add to the already large consumption, and that it will prove itself unequaled, either as a stimulant to the appetite or an aid to digestion.
Opinions of the London Press
"We recommend our correspondent to try MONSIEUR SOYER's new Sauce, entitled the 'Sultana's Sauce.' It is made after the Turkish recipe; its flavor is excellent, and it affords considerable aid in cases of SLOW AND WEAK DIGESTION.—*The Lancet.*
"The Sultana's Sauce is savory, piquant, and spicy; a happy combination of flavors and essences worthy of the delicate taste of a Sultana, the genius of a Soyer, and the universal patronage of a discriminating Public."—*Observer.*
"A concentration of all the piquant resources of Turkey and Russia."—*United Service Gazette.*
"As a titillator of the appetite this Sauce stands alone. It is a most valuable adjunct to Fish, Flesh, or Fowl, and should be placed on every dinner-table."—*Atlas.*
"The Sultana sauce is a most delicious zest."—*Morn Chronicle.*

BOERHAVE'S
HOLLAND BITTERS.

THE CELEBRATED HOLLAND REMEDY FOR
DYSPEPSIA,
DISEASE OF THE KIDNEYS,
LIVER COMPLAINT,
WEAKNESS OF ANY KIND,
FEVER AND AGUE,
And the various affections consequent upon a disordered
STOMACH OR LIVER,
such as Indigestion, Acidity of the Stomach, Colicky Pains, Heartburn, Loss of Apetite, Despondency, Costiveness, Blind and Bleeding Piles. In all Nervous, Rheumatic and Neuralgic Affections, and in others effected a decided cure.
This is a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Holland Professor, Borhave. Its reputation at home produced its introduction here, the demand commencing with those of the Fatherland scattered over the face of this mighty country, many of whom brought with them and handed down the tradition of its value. It is now offered to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged.
It is particularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent spirits, or other forms of dissipation. Generally instantaneous in affect, it finds its way directly to the seat of life, thrilling and quickening every nerve, raising up the drooping spirit and infusing new health and vigor in the system.
READ CAREFULLY! The genuine highly concentrated Borhave's Holland Bitters is put up in half-pint bottles only, and retailed at ONE DOLLAR per bottle. The great demand for this truly wonderful Medicine has induced many imitations, which the public should guard against purchasing.
Beware of imposition! See that our name is on the label of every bottle before you buy.

THE LIVER INVIGORATOR!
PREPARED BY DR. SANFORD,
Compounded entirely from Gums
IS ONE OF THE BEST PURGATIVE and Liver medicines now before the public, that acts as a Cathartic, easier, milder and more effectual than any other medicine known. It is not only a Cathartic, but a Liver remedy, acting first on the Liver to eject its morbid matter, then on the stomach and bowels to carry off that matter, thus accomplishing two purposes effectually, without any of the painful feelings experienced in the operations of most Cathartics. It strengthens the system at the same time that it purges it, and when taken daily in moderate doses, will strengthen and build it up with unusual rapidity.

LIVER INVIGORATOR

The LIVER is one of the principal regulators of the human body; and when it performs its functions well the powers of the system are fully developed. The stomach is almost entirely dependent on the healthy action of the Liver for the proper performance of its functions; when the stomach is at fault, the bowels are at fault, and the whole system suffers in consequence of one organ—the LIVER—having ceased to do its duty. For the diseases of that organ one of the proprietors has made it his study, in a practice of more than twenty years, to find some remedy wherewith to counteract the many derangements which it is liable.

To prove that this remedy is at last found, any person troubled with LIVER COMPLAINT, in any of its forms, has but to try a bottle, and conviction is certain.

These gums remove all morbid or bad matter from the system, supplying in their place a healthy flow of bile, invigorating the stomach, causing food to digest well; PURIFYING THE BLOOD, giving tone and health to the whole machinery, removing the cause of the disease, effecting a radical cure.

BILIOUS ATTACKS are cured, AND WHAT IS BETTER, PREVENTED, by the occasional use of the LIVER INVIGORATOR.

One dose after eating is sufficient to relieve the stomach and prevent the food from rising and souring.

Only one dose taken before retiring prevents NIGHTMARE.

Only one dose taken at night, loosens the bowels gently, and cures COSTIVENESS.

One dose taken after each meal will cure DYSPEPSIA.

☞ One dose of two teaspoonfuls will always relieve SICK HEADACHE.

One bottle taken for female obstruction removes the cause of the disease, and makes a perfect cure.

Only one dose immediately relieves CHOLIC, while

One dose often repeated is a sure cure for CHOLERA MORBUS, and a preventive of CHOLERA.

☞ Only one bottle is needed to throw out of the system the effects of medicine after a long sickness.

☞ One bottle taken for JAUNDICE removes all sallowness or unnatural color from the skin.

One dose taken a short time before eating gives vigor to the appetite, and makes food digest well.

One dose often repeated cures CHRONIC DIARRHEA in its worst forms, while SUMMER and BOWEL complaints yield almost to the first dose.

One or two doses cures attacks caused by WORMS in Children; there is no surer, safer, or speedier remedy in the world, as it never fails.

☞ A few bottles cures DROPSY, by exciting the absorbents.

We take pleasure in recommending this medicine as a preventive for FEVER AND AGUE, CHILL FEVER, and all FEVERS of a BILIOUS TYPE. It operates with certainty, and thousands are willing to testify to its wonderful virtues.

ALL WHO USE IT ARE GIVING THEIR UNANIMOUS TESTIMONY IN ITS FAVOR.
☞ MIX WATER IN THE MOUTH WITH THE INVIGORATOR, AND SWALLOW BOTH TOGETHER.
THE LIVER INVIGORATOR
IS A SCIENTIFIC MEDICAL DISCOVERY, and is daily working cures almost too great to believe. It cures as if by magic, even the first dose giving benefit, and seldom more than one bottle is required to cure any kind of LIVER complaint, from the worst Jaundice or Dyspepsia to a common Headache, all of which are the result of a DISEASED LIVER.
PRICE ONE DOLLAR PER BOTTLE.

THE SENTINEL.

COMMERCIAL.

FRIDAY, July 29th, 1859.

Money Matters, &c.

Money matters are quiet and rates steady. Exchange on New York is selling at 1¼ premium. Discounts at Bank 10 ℔ cent. Not much call for money at present, and the banks take freely what business paper offers. Brokers regulate their rates according to the character of the paper to be negotiated. The general range is 1 to 2 ℔ cent a month for short loans. Gold is selling at the same rate as exchange.

At Chicago, yesterday, exchange went up to 2¼ ℔ cent premium, being a rise of ¾ ℔ cent. The *Press & Tribune* attributes the scarcity of exchange there, mainly to the rapid growth of wild cat banks, and general derangement of their State currency.

NEW YORK MONEY MARKET TO-DAY.—We have the following report of the doings in the New York Money and Stock Markets to-day, by telegraph:

The dealings in stocks are characterized by rather more animation, though, in most instances, at slightly lower prices on the R. R. list. The principal business done was in N. Y. Central and Harlem preferred. N. Y. Central opened at 73¾ but recovered to 74⅛. There was a decline of ½ ℔ cent in Toledo. Mich. Southern guaranteed closes at 21½. Harlem preferred was offered down to 34½, with cash sales at 35. There was quite a speculative movement in Cumberland preferred, which is 2 ℔ cent lower and is offered freely on seller's option. There was more doing to-day in the miscellaneous security. Mich. Central 8 ℔ cent, and Michigan Southern Sinking Fund are 1 ℔ cent lower. N. Y. Central 6's rose 1 ℔ cent.

Virginia 6's are well held; Missouries were easier; Ill Central shares are held higher; the construction bonds have advanced ¾ ℔ cent. The receipts of the Mich Southern road, are so inconsiderable at present that the company have ceased publishing the weekly returns. The receipts of three weeks of July, we understand are about $72,000; the whole month will foot up a trifle over $100,000.

FAILURES IN NEW YORK CITY.—The *Journal of Commerce* of Friday afternoon says:

Messrs. Bird & Johnson, a respectable house in the lard trade, who, it is said, went out of their regular business to pack prime mess pork at war prices, have been unfortunately obliged to suspend. We regret to notice, also, the suspension of Messrs. Hoffman & Stevens, a very respectable house in the flour and grain commission business.

WILD-CAT BANKING IN ILLINOIS.—Illinois is wonderfully prolific of wild-cat banks. Nearly every day ushers one of them into existance, located, generally in some remote quarter of Egypt. The Chicagoans are becoming alarmed under this state of things for the credit of their State, and the *Press & Tribune* loses no opportunity to warn the people against giving currency to these irredeemable "promises to pay." In a recent issue it says:

We are well aware that all we can say upon the subject will have very little effect till the evil become so enormous as to cure itself. So far from withdrawing currency and making exchange with the bonds, the currency makers are issuing it almost without limit. Scarcely a day passes that some new "wild cat" does not pounce upon us from some obscure corner of Egypt, and the circulation of the old banks is being increased enormously. Signing bills, as president or cashier, has become a regular business, both in this city and Springfield. Even boys have powers of attorney to sign bills for the president or cashier, at twenty-five cents per hundred sheets.

Though well convinced that our warnings for the present cannot stop the remorseless wheels of these "rag mills," the meanest tyro in finance can predict the inevitable result. Ere many months another crash must come, and if the people get ninety cents for their promises to pay instead of nine-eight, they may consider themselves fortunate. The soulless sharpers who are preparing this piece of genteel swindling, laugh at our anxiety; but though we have not power to prevent it we shall not cease to warn our renders of the new disgrace that is preparing for our noble State.

The following table shows the movements of breadstuffs at this point for the past 24 hours:

A decidedly firmer feeling was visible in the wheat market to-day, and we think it will not be above the mark to quote the standard gaades 2 to 4c higher. No transactions occurred upon which to base these figures, but we have good authority for saying that 60 to 62c would have been paid for No. 1, had any been offered. With regard to extra club, we have no data upon which to give quotations. A good article, we think, would very readily bring 75c.

A few lots of flour changed hands at $3,50@4,00 for country spring extra, and $5,00 for country ground white winter.

No important change in other articles.

CHICAGO, JULY 28TH.—Receipts: 500 bbls flour; 4,039 bus wheat; 2,540 bus corn; 1,340 bus oats; 24 do. barley. Shipments: 4,118 bbls flour; 7,518 bus wheat; 1,210 bus corn; 1,036 bus oats.

The wheat market opened very firm this morning, and under a good speculative inquiry, spring grades advanced on 'Change 5c—standard reaching 66c in store. In the afternoon, however, a re-action took place, and the market closed weak at 60@61c. There was a better demand for new winter grades, and prices improved 2@3c—one lot of choice white Michigan being sold at $1,10 delivered. The transactions in wheat amount to about 20,000 bushels at the following range of prices: extra white $1,10 delivered; No. 1 white $1,00 in store and $1,05 on track; No. 1 red, 95c on track; standard spring 55@63c in store; No. 2 spring 56c f. o. b. The amount of wheat in store this morning was estimated by Mr. Catlin, Superintendent of the Board of Trade, at about 250,000 bushels.

The stock of flour is very small—estimated at 600 bbls—and the market for choice grades was firmer to-day. The transactions, however, were very limited at $5,25@5,75 for old to new white extra; 4,75 for red winter super; and 3,75 for choice spring extra.

The corn market to-day has been nervous and very unsettled—changing up and down several times from the opening to the close. The buoyancy noted yesterday evening continued this morning till No. 1 corn reached 68c for present delivery and 69c for delivered to-morrow—an advance of 4c. In the afternoon, however, the market became weak and sank back to 61c—rallying again however in the evening, and closes firm at 63c. Upwards of 80,000 bushels changed hands in the course of the day, at 69c f. o. b. for canal; 61@68c for No. 1 in store; 62@63c for No. 2; and 56c for rejected. The amount in store to-day is estimated at about 280,000 bushels.

There was more activity in oats, but the market remains unchanged,—about 8,500 bus No. 1 (crop of 1858) selling at 25c in store. Rye advanced 1@2c. A small lot of No. 2 barley was sold to-day at 85c.—Brewers are afraid to touch the new crop till they think it has time to be properly cured. Highwines are quiet and nominal at 23c. New potatoes continue scarce and in demand, with sales at $1,10@1.12½. Green apples dull and lower—large quantities of Michigan pressing on the market. Hides quiet, and a decline of 1c on green calf. Wool firm but inactive. The clip is nearly all out of first hands, and the consignments here are very light. A lot of 2,000 lbs, half to three-quarter blood fleece, was sold at 39c. Nothing doing in provisions or lard. Tallow firm. Freigets dull—there being no demand for vessels.

MARINE INTELLIGENCE.

Vessels passed Port Colbourne Lock from 4 P. M. on the 25th of July till 4 P. M. on the 25th of July.

Bound West—On 28th: Steam tug G. King, schr Ontario. On 29th: Schrs Ben Franklin, Coleraine, Northern Belle.

Bound East—On 29th: Bark Tiffany.

☞ The following is a list of vessels passing Detroit from Wednesday noon to Thursday noon:

Up—Steamer North Star; prop. Montgomery; schrs. Robt Emmett, James Coleman, Waurecon.

☞ The Detroit *Tribune* says:

The schooner *Coquette*, recently purchased by government for the lake survey service, has been tastefully fitted up and painted. She leaves to-day in tow of the tug *Cliff Belden* for St. Clair river, where she will remain until further orders. She is commanded by J. S. Childs, formerly captain of the prop. *Wabash Valley*.

LAKE AND OCEAN FLEET MARINE.—Capt. Rummage of the *C. H. Walker*, writes from Liverpool to his owners, 5th inst., as follows:

"I arrived here on Saturday, the 8th inst., and have got to dock, with a stern berth, and have to discharge the staves over the tafrail—that is a new style to me. I left Quebec on the 5th of June, and made the passage from land to land in fourteen days, and was only seventeen days from Quebec to St. George Channel, and the remainder of the time was beating up the Channel.

The *Gold Hunter* got to Cork three days after I had passed it, and the *Valeria* arrived at same place one day ahead of us. The *Walker* made very good weather of it, considering that she encountered two gales. One from S. W. changed to N. N. E. and blowed terribly, and during it one of the men was washed overboard, and my second mate, one man, and myself came near following suit. I landed on the forebоom, and getting down as quick as the deck cleared itself of water, hauled the man in. I concluded that the staves would be washed off the deck, but only twenty or thirty were lost.

I can't sell the *Walker* here (there are fifty now for sale) and shall not offer her, but shall probably charter her to go up the Danube, I can't get a big freight up, but a good one back, so as to make about $9,000 for the round trip, which I think I can, with good luck, make in about five months."

CITY LAND OFFICE

WE HAVE THE FOLLOWING VALUABLE Property, which we are authorized to exchange for City Property improved—for Dwelling Houses and Lot in Seventh, First or Fourth Wards:

The undivided sixteenth interest of fourteen thousand and sixty-six acres of valuable Pine Lands, in Marquette county, Michigan. The Lands are surrounded by Mills, and are in the neighborhood of valuable Mines. Prefer having unencumbered property, but would exchange for property that is encumbered, provided the encumbrances are not too large.

Also five hundred and sixty acres of Heavy Timbered Land, in the State of Illinois in a large settlement two and a half miles from the Mississippi river, and within one hundred miles of the city of St. Louis.—Will also exchange this property for house and lot in the Seventh, Fourth or First Wards. The Lands are all free from any encumbrances. Title is perfect.

Also, we will sell that well-known Hotel and two lots, known as the Atlantic House, formerly the Hawkins House, Fifth Ward. Its situation for business is good, being very near the depot of the Milwaukee & Chicago R. R., and immediately opposite the said Hotel six new brick stores are going up. The said Hotel and lots will be sold on ten years credit, without any money being paid down, with seven per cent. interest.

Also a farm of 40 acres 2½ miles from city limits, which we will sell for $2,200, cash.

We have continued applications to exchange city property for farms, and there is also an increased demand for farms from the large emigration which is now coming to our state. Any one who has farms along the La Crosse Railroad it would be well for them to leave a list of same with us.

OGDEN & WALL, City Land Agents.
